NOODLEBIB

QUICK GUIDE TO CREATING CitATIONS IN NOODLEBIB
1. CREATE A PROJECT

Sign-in to your account. Click the green “New project” button near the top left of your screen. A pop-up will appear and ask you to Title your Project, Choose Your citation style, and Choose your citation level (always Advanced for college students).
2. PROJECT DASHBOARD

From this project dashboard you can Share your project with a group or your professor, Create To-do list, etc.
3. CREATE YOUR CITATION

Click Sources on the top menu. Click the green “Create New Citation” button near the top left. A pop-up box will appear. Use the tabs (Database, Website, etc.) to find the type of source you are citing. For example, you’d choose the Database tab and click Journal to cite a Journal article you found in the library databases.
4. INPUT YOUR CITATION INFO

Now, you can start entering your source info into the provided fields. Tip: Click into a field text box to view a pop-up which tells you more about a field and whether the field is necessary or if you can leave it blank.
5. CHECK CITATION INFO

As you add your citation information into the fields, NoodleBib will automatically check for errors. Look for a yellow triangle to the right of the text box. Hover over the triangle with your cursor to view suggestions on how to fix the error.
6. SUBMIT CITATION

Once you click Submit at the bottom of the page, your citation will be generated. You can also include an annotation in the Annotation field if you are completing a Annotated Bibliography.
7. EDIT CITATIONS

On the Sources page, click Options to the right of the citation and click Edit. You can also Delete your citation from this drop-down list.
8. EXPORT YOUR CITATION LIST

Click the Print/Export drop-down and choose from the various options where you want your list exported such as a Word document.
